

Average Isobutane Canister Weight & Dimensions

Average Net Fuel Weight Sizes (g)	% of Fuel Remaining (g)					Dimensions (mm)		Approximate No. Liters of Boiled Water*
	Empty  Full					Diameter	Height	
	0%	25%	50%	75%	100%			
110	100	129	156	184	210	92	70	12
230	150	204	261	317	380	112	92	24
450	210	323	435	548	660	112	140	54

*Many factors such as stove type, wind, initial water temperature and altitude will influence how many liters of water can be boiled. It is recommended to consider a safety factor based on your trip conditions.
